

Guide to Construction Loans

GUIDE TO CONSTRUCTION LOANS

Building a home can be both an exciting and challenging journey, and our construction loan is designed to make the process as simple and stress-free as possible. This guide covers the key points on how your construction loan will work. For more information and to make sure this product is suited to you, speak to your broker or give our Customer Care team a call on **1300 300 989**.

Lending up to 90% value of the completed property

24 months to complete your build

Interest-only repayments during your build

How does a construction loan work?

Our construction loan allows you to access your loan funds at the completion of each stage of your build, meaning that you'll only be paying interest on funds as you need them and not upfront on the full amount. These repayments are interest-only during the construction period and are repaid monthly.

Once your loan has settled, you'll need to complete your construction within 24 months.

To ensure that your construction is fully completed and ready to move in after the final payment, we will always make sure that we're holding enough funds to complete each stage all the way through to the end. If you're not borrowing the whole amount of the construction cost, and contributing funds of your own – you'll need to contribute those funds first. Once all your funds have been contributed, our funding process will begin.

Typical stages of construction:

(Note: The housing industry uses the following percentages as a baseline; these percentages are of a general nature and may vary.)

Stage	Description	Percentages
Deposit	Plans, permits, insurance	5%
Base/ Slab	Concrete slab, footings, base brickwork	10%
Frame	House frame complete and approved by building surveyor	15%
Lock-up	Windows, doors, brickwork, insulation roofing	35%
Fixing	Plumbing, electrical, painting, etc.	25%
Final/ Completion	Fencing, site clean-up, final payment	10%

Construction LVR calculation

LVRs are calculated by expressing the amount borrowed as a percentage of the security value. The security value for construction loans must be calculated using the following figures:

- The lower of the land value shown on the valuation OR Contract of Sale PLUS
- The lower of the improvement value shown on the valuation OR the Fixed Price Building Contract including any variations

In the following example, the security used by Advantedge to calculate the LVR is \$295,000

Stage Contract	Purchase Price	Valuation
Land	\$100,000	\$95,000 ✓
Improvement	\$200,000 ✓	\$210,000
Total	\$300,000	\$305,500

What's required to get an approval?

- A copy of the signed industry standard Fixed Price Building Contract (FPBC), as well as any quotes for extra work outside of the FPBC
- As if complete Valuation – your broker can help you organise this

What valuations are needed?

We'll conduct progress inspection valuations at the Base/ Slab stage of your build or prior to our first payment contribution, and again at Final stage. Please let us know of any contact details for access to the site.

What's a Progress Payment?

A progress payment, or progressive drawdown, is a payment made at each stage of your construction. Before we can release each payment, you'll need to provide us with all the necessary documents outlined below.

To make your first progress payment we will need:

1. Copy of stamped and approved council plans (not necessary for deposit claim)
2. Copy of Builders All Risk Insurance or Certificate of Currency (on insurers letterhead and detailing borrower name, property address, and start/ expiry date of policy)
3. Copy of Home Owners Warranty Certificate for an amount equal or greater than contract price (Tasmania excluded, BSA insurance in QLD)
4. Builder's invoice(s) or receipt

For finishing the job and making your final payment, we will need:

1. An Occupancy Permit, acceptable to the lender in respect of the building works, and any other permission that is required by any relevant authority in relation to the occupation of the land (not applicable in WA, Certificate of Compliance for SA)
2. A Building insurance policy or Certificate of Currency. The amount should not be less than the value of the completed property.

For all payments in between, we simply require a copy of the builder's invoice.

Changes to your build or builder

Where you have agreed to contractual changes with your builder, it is important to notify us immediately. Any variations, especially negative changes (i.e. swapping to lower cost materials or discounts from the builder) may impact the value of the security and require a new valuation.

As your lender, we are obliged to lend to you the amount of your actual construction costs. Any devaluation of the security may require a reduction of your loan amount.

We need to know immediately if for any reason you sign a contract with a different builder. We'll need a newly signed and dated building contract, banking details, a copy of new builder's insurances and any legal documentation relating to the original builder i.e. termination of contract. A new valuation may be required along with credit approval to proceed with the builder.

Settlement Scenarios – how funds will be disbursed

Purpose	Disbursement of funds
Purchase of Land Only	We will release the approved loan facility amount towards the purchase of land
Construction Only	If the loan amount is more than the FPBC, we will retain the full amount of the contract including variations.
Purchase of Land and Construction	If the loan amount is less than the FPBC, we'll retain the loan amount, and you'll need to contribute your own funds towards the settlement. If the loan amount is more than the FPBC, we'll retain the full amount of the contract and forward the remaining funds towards settlement.
Refinance of Land and Construction	We'll retain the full amount of the contract including variations. You will need to contribute your own funds towards the settlement

Where deposits have been paid, we may release up to 5% of the FPBC amount prior to the commencement of any construction works. Funds will be made available towards land settlement.

Other Things to Consider

- All your progress payment claims need to be submitted in accordance with your building contract and can't exceed the amount on the progress payment schedule. This is to ensure you have sufficient funds remaining to complete the build.
- We will only advance funds for works that have been completed and to the bank account nominated by the builder (cheque payments are not accepted).
- We will not be able to advance funds for materials that are purchased or delivered on site, but not incorporated into the structure of the build.
- As set out in your loan terms and conditions we have the right to refuse to make a construction payment if at the time of request there is an event of Default.
- If there are available redraw funds in your construction loan, you may request to access these funds by completing a Client Request Redraws and Transfer Form. Please note that Advantedge will assess your request and make a release of funds at its own discretion.

Frequently asked questions

Can I use First Home Owner Grant (FHOG) funds towards land or construction or both?

Yes, you can use it towards land settlement or during construction; we can also process your FHOG on your behalf, and even have these funds available to be used at the settlement of your land or available at base stage. Discuss this with your broker to ensure the Early Release FHOG form is completed and approved prior to your settlement. Please remember that FHOG cannot be used for land only loans.

What's the maximum I can borrow?

You can borrow up to 95% Loan to Value Ratio (LVR) for Vacant Land, and up to 90% LVR for Construction, inclusive of Lender's Mortgage Insurance (LMI) capitalisation on both scenarios.

Can I apply for vacant land loan without the intention to build?

Yes. Keep in mind that if you do intend to build, you'll need to reduce your LVR to 90% or lower inclusive of LMI.

How many dwellings can be built on one title?

The construction loan can be used for one residential dwelling on the one title.

What if my builder needs a deposit upfront?

We understand that your builder may require a deposit prior to first progress payment, and for that reason we may allow up to 5% to be released to the builder at settlement. If you are refinancing or purchasing, please see the scenario table above.

If the deposit amount in the progress payment schedule is greater than 5%, we require the following documents prior to settlement:

- Builder's All Risk Insurance
- Home Owners Warranty Certificate

What if I cannot complete my build in the required timeframe?

You have up to 24 months from settlement to complete your construction. If your build will not be completed within the required period and you need more time please contact 1300 300 989 to speak to one of our friendly staff.

- If your build is incomplete at 24 months your loan repayment will convert to Principal & Interest, however you will still have access to drawdown funds to pay your builder. Note that due to your principal limit reducing month on month, any shortfall in construction funds resulting from this will require payment using your own funds.

Contacts

Who can I contact and where should I send my documents?

Your broker can assist you with submitting the relevant information and forms required for your construction loan. You can also contact our Customer Care team at advantedge.construction@advantedge.com.au or give us a call on **1300 300 989**.
